Hello Vici Media Employee,

By way of introduction, my name is Joshua Chappell. My intent is to apply for the Growth Marketing & Operations Partner at Vici Media. I feel I have a lot of immediate value I can bring to your organization.

You want someone who leverages AI workflows daily rather than someone who knows what AI is. That is how I already work. At Charter One I used Claude agentic coding to build content workflows that cut production times in half, and through my own company I slashed creative production by 30% using AI across the pipeline. Those workflows sit next to real campaign results: a 200% lift in ad click-through rates and a social initiative that drove 20x the engagement of standard content.

The operations half of this role is familiar too. I have run my own company for six years, which means turning a loose goal into a plan, building the system, managing the budget and the vendors, and closing the gap before anyone has to ask. I hold a Master's in Marketing with a specialization in Marketing Analytics, so the numbers guide the decisions rather than decorate them.

I appreciate that you value autonomy, adaptability, and total ownership of your domains; these are all values that I strive to emulate.

Thank you for taking the time out of your busy day to read my letter. I look forward to the opportunity of doing an interview with you.

Sincerely,
Joshua Chappell
